

KITTIKARN JANBANG

Full-Stack Developer

Samut Prakan, Thailand | 064-956-4959 | kt.janbang@gmail.com

GitHub: idogpond | LinkedIn: Kittikarn Janbang

PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of experience specializing in modernizing legacy systems — migrating monolithic Laravel Blade applications into decoupled architectures with React frontends and Laravel REST APIs. Experienced in full backend refactoring, version upgrades, and API redesign to ensure full feature parity. Also built and maintained 10+ production applications in healthcare and travel domains.

CORE SKILLS

Backend:	PHP (Laravel), .NET Core / C#, Express.js, RESTful API design, JWT Authentication
Frontend:	JavaScript (ES6+), TypeScript, React.js, Vue.js, HTML5, CSS3 / SCSS / SASS, Tailwind CSS, Bootstrap, PrimeReact / PrimeFlex
Databases:	MySQL, Microsoft SQL Server (query optimization, indexing, stored procedures)
Architecture:	MVC Architecture, Legacy System Modernization, Monolith-to-API Migration, Code Review, Performance Optimization, Error Handling & Logging, Environment-Based Configuration, Manual & Regression Testing
Tools & DevOps:	Git, Docker, Composer, npm / yarn, VS Code, Visual Studio

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer — AD System Asia Co., Ltd.

Oct 2022 – Present

Samut Prakan, Thailand

- Designed, built, and maintained 10+ production-grade web applications powering Clinic Appointment and Travel-booking systems used by daily clients.
- Owned full-stack development end-to-end: API architecture in PHP Laravel and .NET Core, frontend in React with PrimeReact, and MySQL / SQL Server data layer.
- Implemented secure JWT-based authentication, role-based access control, and environment-based configuration for staging / production parity.
- Optimized database queries and refactored legacy modules, cutting page load and API response times by approximately half, and simplifying complex data retrieval logic.
- Led solo migration of a monolithic Laravel Blade application to a decoupled architecture (React SPA + Laravel REST API), including full backend refactoring and version upgrade.
- Conducted code reviews, regression testing, and manual QA to keep release quality high in a small, fast-moving team.

Developer Intern — A-Host Company Limited

Dec 2020 – Mar 2021

Bangkok, Thailand

- Built a responsive frontend in Vue.js integrated with .NET Core APIs backed by Microsoft SQL Server.
- Implemented CRUD modules processing 1,000+ records per month, including form validation, list/detail views, and error handling.
- Collaborated with senior engineers in code reviews and gained exposure to enterprise-grade .NET workflows.

SELECTED PROJECTS

- **Clinic Appointment System (QuickRes.org)** — Multi-country clinic appointment platform with QuickRes.org as the main system and dedicated country-specific deployments across Thailand, Cambodia, Ukraine, and others — serving 30+ clinics in total. Designed booking flow, doctor calendar, and notification logic. Stack: Laravel + React + MySQL.
- **Travel Booking Platform** — In-development travel management system. Implemented Stripe payment integration and built admin panel for back-office workflows. Stack: .NET Core + React + SQL Server.
- **Internal Admin Dashboards** — Reusable admin templates with PrimeReact components, role-based menus, and standardized API patterns adopted across multiple client projects.

EDUCATION

B.Sc. in Information Technology — Burapha University, Thailand

2018 – 2022

LANGUAGES

Thai (Native) | English (Reading, Writing & Listening – Working Proficiency; Speaking – Basic)
