

# KITTIKARN JANBANG

## Full-Stack Developer

Samut Prakan, Thailand | 064-956-4959 | kt.janbang@gmail.com

GitHub: idogpond | LinkedIn: Kittikarn Janbang

### PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years building and maintaining web applications for healthcare and travel businesses. Most of that time has gone into taking an old Laravel Blade system apart and rebuilding it as a React frontend talking to a Laravel API, while keeping everything clients already depended on working the same as before. Comfortable owning a feature end-to-end, from the database up to the UI.

### CORE SKILLS

|                            |                                                                                                                                              |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Backend:</b>            | PHP (Laravel), .NET Core / C#, Express.js, RESTful API design, JWT Authentication                                                            |
| <b>Frontend:</b>           | JavaScript (ES6+), TypeScript, React.js, Next.js, Vue.js, HTML5, CSS3 / SCSS / SASS, Tailwind CSS, Bootstrap, PrimeReact / PrimeFlex         |
| <b>Databases:</b>          | MySQL, Microsoft SQL Server (query optimization, indexing, stored procedures)                                                                |
| <b>Architecture:</b>       | MVC Architecture, Legacy System Modernization, Monolith-to-API Migration, Code Review, Performance Optimization, Manual & Regression Testing |
| <b>Tools &amp; DevOps:</b> | Git, Docker, Composer, npm / yarn, VS Code, Visual Studio                                                                                    |

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| <b>Full-Stack Web Developer — AD System Asia Co., Ltd.</b><br><i>Samut Prakan, Thailand</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <b>Oct 2022 – Present</b>  |
| <ul style="list-style-type: none"><li>• Build and maintain 12 web apps for clinic-appointment and travel-booking systems, handling everything from database design up to the UI.</li><li>• Migrated a large legacy Laravel Blade app to React solo: evaluated React libraries/packages, then split the old Blade controllers into a standalone API server for the frontend to consume.</li><li>• Cut a slow report page's load time from ~30s to ~10s by consolidating 2–3 duplicate queries into one, on a 50-row-per-page table pulling from 10,000+ records.</li><li>• Set up JWT authentication and role-based permissions so different staff roles only see what they should.</li><li>• Do code reviews and manual/regression testing before releases. It's a small team, so this is what catches most issues before they reach a client.</li></ul> |                            |
| <b>Developer Intern — A-Host Company Limited</b><br><i>Bangkok, Thailand</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <b>Dec 2020 – Mar 2021</b> |
| <ul style="list-style-type: none"><li>• Developed the frontend in Vue.js for an internal system, wired up to .NET Core APIs and a SQL Server database.</li><li>• Built out the CRUD screens (forms, list/detail views, error handling) for a system handling 1,000+ records a month.</li><li>• First real exposure to enterprise .NET practices, mostly through code reviews with senior engineers.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                            |                            |

### SELECTED PROJECTS

- **QuickRes.org (Clinic Appointment System)** — A booking platform live in 13 countries (including Thailand, Cambodia, and Ukraine), serving 50+ clinics. Designed the booking flow, doctor calendar, and notification logic myself. Stack: Laravel + React + MySQL.
- **Travel Booking Platform** — Currently building a travel management system with Stripe payments and an admin panel for back-office staff. Stack: .NET Core + React + Next.js + SQL Server.
- **Internal Admin Dashboards** — A set of admin templates (PrimeReact, role-based menus) that got reused across a few client projects instead of rebuilding the same screens from scratch each time.

### EDUCATION

B.Sc. in Information Technology — Burapha University, Thailand

**2018 – 2022**

### LANGUAGES

Thai (Native) | English (Reading, Writing & Listening – Working Proficiency; Speaking – Basic)
